

Now in the treatment of non-small cell lung cancer:

My Body Remembers

So, this time...I will triumph.

IMJUDO targets, attacks, and defeats PDL1.
And it never forgets the enemy.

In the treatment of non-small cell lung cancer:

A woman's face is shown in profile, looking towards the right. Her right eye is replaced by a clock face with Roman numerals. The background is dark with glowing golden particles and light trails around her head.

Memory

makes me

DANGEROUS.

IMJUDO targets, attacks, and defeats PDL1.
And it never forgets the enemy.

Now for non-small cell lung cancer:

Science turns me on.

IMJUDO is an advanced therapy that empowers the immune system to find, attack, and defeat PDL1.

Best of all, it helps the immune system remember. So, if it comes back, patients will be ready.
